"Passion for Excellence"

Participant ID	[REDACTED]
Participant Name	[REDACTED]
Test Center Name	[REDACTED]
Test Date	28/02/2020
Test Time	1:00 PM - 2:30 PM
Subject	NURSING OFFICER STAFF NURSE GRADE II

Section : Subject knowledge of concerned post Nursing

Q.1 What is the full form of ACTH?

- Ans 1. Adreno cortico Tropic hormone
 2. Angiotensin converting enzyme
 3. Acetylcholine
 4. Angiotensin converting hormone

Question ID : 59445917283
Status : Answered
Chosen Option : 1

Q.2 Inhibin is secreted by:

- Ans 1. Stroma
 2. Leydig cells
 3. Corpus luteum
 4. Surface epithelium

Question ID : 59445917350
Status : Answered
Chosen Option : 2

Q.3 Calorie intake of 1 year old child:

- Ans 1. 1000 Kcal/day
 2. 800 Kcal/day
 3. 1200 Kcal/day
 4. 1500 Kcal/day

Question ID : 59445917308
Status : Answered
Chosen Option : 3

Q.4 The famous 14 principles of Management was first defined by:

- Ans
- 1. Elton Mayo
 - 2. Adam Smith
 - 3. Henri Fayol
 - 4. James Watt

Question ID : 59445917336
Status : Answered
Chosen Option : 3

Q.5 A nurse demonstrates caring, sincerity, empathy and trustworthiness:

- Ans
- 1. Ethical nurse-patient interaction
 - 2. Emotional nurse-patient interaction
 - 3. Legal nurse-patient interaction
 - 4. Therapeutic nurse-patient interaction

Question ID : 59445917343
Status : Answered
Chosen Option : 4

Q.6 Vaccines and toxoids produce:

- Ans
- 1. Passive immunity
 - 2. Acquired immunity
 - 3. Active immunity
 - 4. Natural immunity

Question ID : 59445917323
Status : Answered
Chosen Option : 1

Q.7 A 45 days old infant development icterus and two days' later symptoms and signs of acute liver failure appeared. Child was found to be B+ve for HbsAg. The mother was also HbsAg carrier. The mother's hepatitis B serological profile is likely to be:

- Ans
- 1. Hbs Ag and anti Hbe Ab +ve
 - 2. Mother infected with mutant HBV
 - 3. Hbs Ag +ve only
 - 4. Hbs Ag and Ag +ve

Question ID : 59445917300
Status : Answered
Chosen Option : 2

Q.8 Lactated Ringer's solution is contraindicated in:

- Ans
- 1. Fluid lost as bile or diarrhea
 - 2. Hypovolemia
 - 3. Lactic acidosis
 - 4. Burns

Question ID : 59445917273
Status : Answered
Chosen Option : 3

Q.9 These agents decrease intestinal muscle tone to slow passage of feces:

- Ans
- 1. Hypertonic
 - 2. Cathartics
 - 3. Laxatives
 - 4. Antidiarrheal opiate agents.

Question ID : 59445917277
Status : Answered
Chosen Option : 4

Q.10 An infant is to receive thyroxin sodium, 0.35 mg once a day orally. The medications is available in elixir from 0.25 mg/mL. How much elixir should the nurse administer?

- Ans
- 1. 1.4 mL
 - 2. 1.0 mL
 - 3. 2.4 mL
 - 4. 1.3 mL

Question ID : 59445917276
Status : Answered
Chosen Option : 1

Q.11 A 34-year-old woman complains about pain due to lower abdominal cramping, urine hCG is positive and pelvic ultrasound reveals a 10-week intrauterine pregnancy. The patient states that she is not sure whether to keep the pregnancy. Which of the following is the most appropriate next step in management?

- Ans
- 1. Inform the patient's parents
 - 2. Inform the patient's partner
 - 3. Counsel the patient or refer to an appropriate counselor
 - 4. Termination of pregnancy

Question ID : 59445917288
Status : Answered
Chosen Option : 2

Q.12 Based on the knowledge of electroconvulsive treatment, the nurse explains to the student nurses that atropine is given before the treatment primarily to:

- Ans
- 1. Minimize intestinal contractions
 - 2. Decrease anxiety
 - 3. Prevent aspiration
 - 4. Increase body secretions

Question ID : 59445917349
Status : Answered
Chosen Option : 2

Q.13 Modified ECT is not given frequently on routine practice because of:

- Ans
- 1. Myocardial infarction
 - 2. Non availability of anesthetist
 - 3. Osteoporosis
 - 4. Respiratory difficulties

Question ID : 59445917303
Status : Answered
Chosen Option : 2

Q.14 In depression there is deficiency of:

- Ans
- 1. Acetylcholine
 - 2. Dopamine
 - 3. 5-HT
 - 4. GABA

Question ID : 59445917305
Status : Answered
Chosen Option : 2

Q.15 An acid-fast bacillus which is pathogenic:

- Ans
- 1. Bascillus pertusis
 - 2. Coryne bacterium diphtheria
 - 3. Mycobacterium leprae
 - 4. Salmonella typhi

Question ID : 59445917325
Status : Answered
Chosen Option : 3

Q.16 The spinal cord is made up of 7 cervical vertebrae, 5 lumber vertebrae, 4 or 5 fused sacral vertebrae, 4 or 5 coccygeal vertebrae and how many thoracic vertebrae?

- Ans
- 1. 8
 - 2. 5
 - 3. 12
 - 4. 10

Question ID : 59445917282
Status : Answered
Chosen Option : 3

Q.17 Which of the following means translating the message into verbal and nonverbal symbol to communicate the receiver?

- Ans
- 1. Feedback
 - 2. Encoding
 - 3. Decoding
 - 4. Channel

Question ID : 59445917346
Status : Answered
Chosen Option : 4

Q.18 Eugenics means:

- Ans
- 1. Genetic counseling
 - 2. Improvement of genetic endowment
 - 3. Genetic preventive measures
 - 4. Improvement of environment

Question ID : 59445917345
Status : Answered
Chosen Option : 2

Q.19 When using nonverbal communication in a nurse-client relationship, the nurse must be most aware of:

- Ans
- 1. Ethnic background
 - 2. The client's development level
 - 3. Contradictions to the clients
 - 4. Nervous hand movements

Question ID : 59445917339
Status : Answered
Chosen Option : 3

Q.20 How does audit differ from research?

- Ans
- 1. It is more likely to be applicable to nursing
 - 2. It can be carried out on inanimate objects
 - 3. It does not need as many people to collect the information
 - 4. It does not increase our understanding of the topic itself or allow us to transfer the results to other situations

Question ID : 59445917328
Status : Answered
Chosen Option : 3

Q.21 Which of the following intervention demonstrate the nurse understand about the newborn's thermoregulatory ability?

- Ans
- 1. Placing the newborn under a radiant warmer
 - 2. Suctioning with a bulb syringe
 - 3. Obtaining an APGAR score
 - 4. Inspecting the newborn's umbilical cord

Question ID : 59445917287
Status : Answered
Chosen Option : 1

Q.22 What is the most serious complication of meningitis in young children?

- Ans
- 1. Epilepsy
 - 2. Peripheral circulatory collapse
 - 3. Blindness
 - 4. Communicating hydrocephalus

Question ID : 59445917348
Status : Answered
Chosen Option : 1

Q.23 Additional defects associated with exstrophy of bladder is:

- Ans
- 1. Imperforate rash
 - 2. Congenital heart disease
 - 3. Pubic bone malformation
 - 4. Absence of one kidney

Question ID : 59445917298
Status : Answered
Chosen Option : 2

Q.24 7.0 is the normal pH of the:

- Ans
- 1. Blood in the testicular vein
 - 2. Fluid within a typical cell
 - 3. Blood in the renal artery
 - 4. Urine

Question ID : 59445917315
Status : Answered
Chosen Option : 2

Q.25 Causative organism of infectious mononucleosis is:

- Ans
- 1. Toxoplasma
 - 2. Cytomegalovirus
 - 3. Epstein-Barr Virus
 - 4. Varicella zoster virus

Question ID : 59445917318
Status : Answered
Chosen Option : 3

Q.26 All the following are a good source of Omega 3 PUFA except:

- Ans
- 1. Ground oil
 - 2. Mustard oil
 - 3. Fish oil
 - 4. Corn oil

Question ID : 59445917307
Status : Not Answered
Chosen Option : --

Q.27 Inadequate intake by the pregnant woman of which vitamin can cause neural tube defect?

- Ans
- 1. Niacin
 - 2. Thiamine
 - 3. Folic acid
 - 4. Riboflavin

Question ID : 59445917312
Status : Answered
Chosen Option : 2

Q.28 Acid medium of vaginal maintained by:

- Ans
- 1. Trichomonas vaginalis
 - 2. Staphylococci
 - 3. Doderleins bacilli
 - 4. E-coli

Question ID : 59445917321
Status : Answered
Chosen Option : 3

Q.29 Nurse's main priority assessment while caring for the client having spontaneous abortion:

- Ans
- 1. Hemorrhage
 - 2. Hypertension
 - 3. Dehydration
 - 4. Subinvolution

Question ID : 59445917292
Status : Answered
Chosen Option : 1

Q.30 Passive immunity against tetanus is obtained by the administration of:

- Ans
- 1. DT
 - 2. TT
 - 3. DPT
 - 4. Tetanus immunoglobulin

Question ID : 59445917322
Status : Answered
Chosen Option : 4

Q.31 The system of evaluation where an employee is measured against his/her co-worker is called:

- Ans
- 1. Ranking
 - 2. Critical incidents
 - 3. Reports
 - 4. Graphic records

Question ID : 59445917341
Status : Answered
Chosen Option : 1

Q.32 Nursing care that is based on identifying and meeting the needs of a patient is called:

- Ans
- 1. Hegar sign
 - 2. Goal-oriented
 - 3. Client-oriented
 - 4. Prioritization

Question ID : 59445917332
Status : Answered
Chosen Option : 3

Q.33 When palpating a abdomen of hypertrophic pyloric stenosis infant, the nurse finds:

- Ans
- 1. Rhythmic peristaltic waves in the lower abdomen
 - 2. Distended colon
 - 3. An olive sized mass in right upper abdomen
 - 4. Marked tenderness around the abdomen

Question ID : 59445917299
Status : Answered
Chosen Option : 1

Q.34 OSCE Means:

- Ans
- 1. Observation subject Clinical Examination
 - 2. Objective structured Clinical Examination
 - 3. Objective subjective Clinical Examination
 - 4. Observation structured Clinical Examination

Question ID : 59445917335
Status : Answered
Chosen Option : 2

Q.35 Maize is deficit in:

- Ans
- 1. Threonine
 - 2. Tryptophan
 - 3. Methionine
 - 4. Leucine

Question ID : 59445917306
Status : Not Answered
Chosen Option : --

Q.36 The following delusions are common in depression except:

- Ans
- 1. Delusion of Nihilism
 - 2. Delusion of persecution
 - 3. Delusion of grandeur
 - 4. Delusion of poverty

Question ID : 59445917301
Status : Answered
Chosen Option : 4

Question ID : 59445917271
Status : Answered
Chosen Option : 1

Q.38 Motilin is secreted by cells in:

- Ans
- 1. Liver
 - 2. Pancreas
 - 3. Oesophagus
 - 4. Ileum

Question ID : 59445917347
Status : Answered
Chosen Option : 2

Q.39 The patient has to undergo a loop electrosurgical excision procedure (LEEP), which of the following represents the potential long-term complications from this procedure?

- Ans
- 1. Cervical incompetence and cervical stenosis
 - 2. Constipation
 - 3. Hernia and intraperitoneal adhesions
 - 4. Abscess

Question ID : 59445917286
Status : Answered
Chosen Option : 1

Q.40 Socialization into one's primary culture as a child is known as:

- Ans 1. Enculturation
 2. Biculturation
 3. Acculturation
 4. Assimilation

Question ID : 59445917278
Status : Answered
Chosen Option : 4

Q.41 Rorschach Inkblot test, Thematic apperception test are based on the phenomenon of:

- Ans 1. Observation
 2. Projection
 3. Identification
 4. Transference

Question ID : 59445917337
Status : Answered
Chosen Option : 1

Q.42 Hygiene factors and motivational factors are key concepts in:

- Ans 1. Expectancy theory
 2. Goal setting theory
 3. Herzberg's two factor theory
 4. Maslow's hierarchy of needs

Question ID : 59445917338
Status : Answered
Chosen Option : 4

Q.43 The characteristic of an ideal normal distribution curve is / are:

- Ans 1. Bell shaped
 2. Its symmetrical around the mean
 3. Prescription
 4. Mean, median and mode do not coincide

Question ID : 59445917329
Status : Not Answered
Chosen Option : --

Q.44 Modern concept of chemotherapy was proposed by:

- Ans 1. Josph lister
 2. Metchnikoff
 3. Paul ehrlich
 4. Frankel

Question ID : 59445917320
Status : Answered
Chosen Option : 4

Q.45 Epidemic dropsy is due to:

- Ans 1. BOAA
 2. Sanguinarine
 3. Ergot
 4. Aflatoxin

Question ID : 59445917309
Status : Answered
Chosen Option : 1

Q.46 The continuing process of measuring services, products and practices of an organization against the strongest competitors in quality control and quality assurance is known as:

- Ans 1. Quality Improvement
 2. Bench Marking
 3. Auditing
 4. Quality Assurance

Question ID : 59445917333
Status : Answered
Chosen Option : 4

Q.47 The genetic material, deoxyribonucleic acid (DNA) is contained in:

- Ans 1. Chromatin
 2. Nucleoli
 3. Chromosome
 4. Nucleus

Question ID : 59445917280
Status : Answered
Chosen Option : 4

Q.48 Ketone bodies are found in urine of patients with uncontrolled diabetes due to:

- Ans
- 1. Increased metabolism of fat
 - 2. Decomposition of excess sugar in blood
 - 3. Impaired kidney function
 - 4. Increased metabolism of protein

Question ID : 59445917324
Status : Answered
Chosen Option : 2

Q.49 The best and safest method of sterilization is:

- Ans
- 1. Immersion in chemical germicide
 - 2. Flaming
 - 3. Autoclaving
 - 4. Boiling for 30 minutes

Question ID : 59445917319
Status : Answered
Chosen Option : 3

Q.50 What is the major nursing responsibility when administering sulfonamide preparation?

- Ans
- 1. Monitor child's temperature
 - 2. Weigh the child daily
 - 3. Give milk with medication
 - 4. Administer the drug at prescribed times

Question ID : 59445917296
Status : Answered
Chosen Option : 4

Q.51 The visceral pleura is:

- Ans
- 1. The membrane lining surface of the lungs
 - 2. The membrane lining the wall of the thoracic cavity
 - 3. The thinnest portion of the peritoneum
 - 4. The fluid around the lungs

Question ID : 59445917279
Status : Answered
Chosen Option : 1

Q.52 Which of the following techniques are examples of nontherapeutic communication?

- Ans
- 1. Giving advice
 - 2. Focusing
 - 3. Restating
 - 4. Paraphrasing

Question ID : 59445917340
Status : Answered
Chosen Option : 2

Q.53 Major approaches in problem solving are:

- Ans
- 1. Inductive, deductive, active, analytic
 - 2. Inductive, deductive, purposive, synthetic
 - 3. Inductive, deductive, initiative, synthetic
 - 4. Inductive, deductive, analytic, synthetic

Question ID : 59445917334
Status : Not Answered
Chosen Option : --

Q.54 Acute illness refers to an illness that:

- Ans
- 1. Is longer than 6 months, and can also effect functioning in any dimension
 - 2. Is synonymous with disease
 - 3. Has a short duration and is severe
 - 4. Causes and irreversible condition

Question ID : 59445917274
Status : Answered
Chosen Option : 1

Q.55 Intrinsic factor of castle is secreted by:

- Ans
- 1. Parietal cells
 - 2. Mucus cells
 - 3. B Cells
 - 4. Chief cells

Question ID : 59445917313
Status : Answered
Chosen Option : 1

Q.56 Which mode of clinical application for qualitative research is considered to be the sharing of qualitative findings with the patient?

- Ans
- 1. Coaching
 - 2. Empathy
 - 3. Anticipatory guidance
 - 4. Assessment of progress

Question ID : 59445917331
Status : Answered
Chosen Option : 2

Q.57 An order for prednisolone reads 10 mg four times a day. The dose for the child is 2 mg/day. How many pounds does the child weigh?

- Ans
- 1. 36 pounds
 - 2. 44 pounds
 - 3. 40 pounds
 - 4. 46 pounds

Question ID : 59445917297
Status : Not Answered
Chosen Option : --

Q.58 Thiamine has been prescribed for an alcoholic patient. the rationale for administration of this, medication is the prevention of:

- Ans
- 1. Huntington's disease
 - 2. Alcoholic dementia
 - 3. Alcohol withdrawal syndrome
 - 4. Wernicke-Korsakoff syndrome

Question ID : 59445917304
Status : Answered
Chosen Option : 4

Q.59 Which is the most relevant knowledge about oxygen administration to a client with COPD?

- Ans
- 1. Oxygen is administered best using a nonrebreather mask
 - 2. Blood gases are monitored using a pulse oximeter.
 - 3. Hypoxia stimulates the central chemoreceptors I the medulla that makes the client breath.
 - 4. Oxygen at 1-2 L/mi is given to maintain the hypoxic stimulus for breathing.

Question ID : 59445917284
Status : Answered
Chosen Option : 1

Q.60 Which of the following statement is not applicable to using a evidence-base in nursing practice?

- Ans
- 1. To ensure the best quality of care given to patients

 - 3. The use of research evidence in nursing practice does not need to be evaluated after it is used or implemented.
 - 4. Evidence used in nursing practice must be appraised for its validity and applicability.

Question ID : 59445917327
Status : Answered
Chosen Option : 3

Q.61 Assessing the laboratory findings which results would the nurse most likely expect to find in a client with chronic renal failure?

- Ans
- 1. Decreased serum calcium, blood pH 7.2, Potassium 6.5 m Eq/L
 - 2. BUN 35 to 40 mg/dl, Potassium 3.5 mEq/L, Ph 7.35, decreased serum calcium
 - 3. BUN 15 mg/dl, increased serum calcium, creatinine 1.0 mg/dl
 - 4. BUN 10 to 30 mg/dl, creatinine 0.5 to 1.5 mg/dl

Question ID : 59445917285
Status : Answered
Chosen Option : 1

Q.62 Which of the following help prevent water loss through skin?

- Ans
- 1. Melanin
 - 2. Carotene
 - 3. Keratin
 - 4. Collagen

Question ID : 59445917281
Status : Answered
Chosen Option : 4

Q.63 The situation in which individuals have excessive worry or belief that they are suffering from a physical illness despite lack of medical evidence is known as:

- Ans
- 1. Dissociative disorder
 - 2. Pain disorder
 - 3. Somatoform disorder
 - 4. Phobic disorder

Question ID : 59445917302
Status : Answered
Chosen Option : 1

Q.64 Sunken fontanelle is a sign of:

- Ans
- 1. Turners syndrome
 - 2. Hydrocephalus
 - 3. Down's syndrome
 - 4. Dehydration

Question ID : 59445917295
Status : Answered
Chosen Option : 4

Q.65 Elements of primary healthcare are the following except:

- Ans
- 1. Health education
 - 2. Intersectoral coordination
 - 3. Provision of essential drugs
 - 4. Cost effectiveness

Question ID : 59445917311
Status : Answered
Chosen Option : 4

Q.66 Disposal of expired and cytotoxic drugs is by:

- Ans
- 1. Autoclaving
 - 2. Municipal waste
 - 3. Chemical treatment
 - 4. Separate landfill disposal

Question ID : 59445917310
Status : Answered
Chosen Option : 4

Q.67 The ability of a person to readily recover from stressful situations is called:

- Ans
- 1. Mental freedom
 - 2. Androgyny
 - 3. Resilience
 - 4. Hardiness

Question ID : 59445917326
Status : Answered
Chosen Option : 1

Q.68 A method in which several rounds of questions are given to a panel of experts is called:

- Ans
- 1. Q-sort methodology
 - 2. Content analysis
 - 3. Delphi technique
 - 4. Meta-analysis

Question ID : 59445917330
Status : Answered
Chosen Option : 1

Q.69 Which of the following is a differentiating test between mucus and cerebrospinal fluid (CSF) from a nasal discharge:

- Ans
- 1. Specific gravity
 - 2. Protein
 - 3. Microorganism
 - 4. Glucose

Question ID : 59445917316
Status : Answered
Chosen Option : 4

Q.70 The nurse is informed that a client with a large surgical incision is being transferred from the intensive care unit to the surgical unit. What medication does the nurse anticipate the physician will order for this client?

- Ans
- 1. Ascorbic acid
 - 2. Vitamin A
 - 3. Vitamin B12 complex
 - 4. Mephyton

Question ID : 59445917275
Status : Answered
Chosen Option : 1

Q.71 Before the placenta functions the corpus luteum is the primary source of synthesis of which of the following hormones:

- Ans
- 1. T4 and TSH
 - 2. Estrogen and progesterone
 - 3. Cortisol and thyroxine
 - 4. LH and FSH

Question ID : 59445917291
Status : Answered
Chosen Option : 2

Q.72 The following develops as a result of a nurse's experience in a specific clinical area, the time the nurse has been in practice, and the quality of relationships the nurse has formed with clients:

- Ans
- 1. Knowing clients
